Anti-Cyber Bullying Policy

Technology is being used in school to achieve excellence in education through embedding opportunities to cater for the needs of individual students. Recognizing the importance of keeping abreast with and informed about students' use of technologies, and their potential abuse and risks, the school created a series of procedures. In this regard, DMES is committed to fostering a climate where all students feel safe and supported and are protected from the dangers of the cyber world. We promote a school environment where opportunities for cyber bullying and harassment do not occur; and where students are molded to become good digital citizens who use technology safely and responsibly.

DMES upholds its ongoing commitment to eradicating bullying and its forms from the school community and from the behavioral conduct of its students in their lives within and beyond the school. We aim to:

- Provide awareness and guidance for staff, students, and parents in recognizing different forms of cyber bullying and in preventing and responding to cyber bullying.
- Ensure that all students are taught about cyber safety and digital literacy through various teaching and learning opportunities.
- Work with safeguarding partners and local authorities in establishing cyber bullying prevention measures and in addressing cyber bullying issues.
